Dear Thomas,

### Re: Recovering of debts from All Lines Comm Far East

We received your letter dated 6 January 2020 with a cheque attached stating that this is the final payment received from our debtor . Upon seeing the letter, I suddenly felt a sense of relief and at the same time a great sense of gratitude to you and your team who has acted professionally and patiently to pursue the debtor relentlessly until the full amount of the debt is repaid to us.

Initially when we were faced with this problem, we were thinking of a few options which includes going to the court to recover the debts . We discarded this option as we are not so confident that after going through the legal process, will the debtor eventually have the money to pay up. And on top of that, a portion of the debt owed is a personal loan without official agreement made in writing.

Finally , I felt that the best chance is to find a debt recovery party to pursue the case on our behalf.

I searched on line and found your company amongst many others but what make us choose your company was because of your clients positive review of your company service performance as well as your company touting that the success rate is 90 % which is very impressive.

Initially, we were quite skeptical that the debt can be fully recovered but after the first cheque that we received from you , we felt I that our decision to choose your company is the right choice

I do believe this will not be the last job for your company. And we will engage your company again without hesitation if the need arises. I had also shared with my business associates and contact on your company capability and recommend that they should contact you if the need arises .

Once again, on behalf of our management, we thank you very much

Yours faithfully,

Alan Wong  
Director
